Government decree on waste
(179/2012)

Chapter 1 – General provisions

Section 1
Definitions

For the purposes of this Decree:
1) *separate collection* means the collection of waste where waste is kept separately by type and nature so as to facilitate recycling, other types of recovery or other specific treatment;
2) *oil waste* means any lubrication or industrial oil consisting completely or partly of mineral oil or synthetic oil, which has become unfit for the use for which it was originally intended, or any other waste-containing oil;
3) *biowaste* means biodegradable food and kitchen waste from households, restaurants, caterers and retail premises, comparable waste from food processing, and biodegradable garden and park waste;
4) *construction and demolition waste* means waste from new construction and repairs and demolition of buildings or other fixed structures, civil engineering work or other corresponding construction;
5) *municipal wastewater sludge* means the sludge from wastewater treatment plants treating municipal wastewater or other wastewater comparable to municipal wastewater in quality, however not sludge in cess pools and septic tanks nor other sludge from the domestic wastewater treatment system on a property.

Section 2
Operations for the recovery and disposal of waste

(1) Annex 1 to this Decree contains a list of the operations which constitute ‘recovery of waste’ as referred to in section 6(1)(15) of the Waste Act (646/2011). Even operations other than those mentioned in the list constitute recovery of waste if they meet the requirements laid down in the aforementioned paragraph of the Waste Act.

(2) Annex 2 contains a list of the operations which constitute ‘disposal of waste’ as referred to in section 6(1)(16) of the Waste Act. Even operations other than those mentioned in the list constitute disposal of waste if they meet the requirements laid down in the aforementioned paragraph of the Waste Act.
Section 3
Hazardous properties of waste

Provisions on the hazardous properties of waste, referred to in section 6(1)(1) of the Waste Act, and the limit values applicable in interpreting them, are laid down in annex 3.

Section 4
List of waste and hazardous waste

Provisions on the list of the most common types of waste and of hazardous waste (list of waste) are laid down in annex 4.

Section 5
Waste generated in holiday homes

Waste from summer cottages intended mainly for the owner’s own use, leased holiday cottages and timeshare holiday accommodation, and other corresponding vacation homes, constitutes waste generated in holiday homes, as referred to in section 32(1)(1) of the Waste Act. However, waste generated in a holiday village providing hotel-like services is not regarded as such waste.

Section 6
Application of the Waste Act to Defence Force operations

Subject to the conditions laid down in section 4(1) of the Waste Act, the Waste Act shall not apply to the following operations of the Defence Forces:
1) operations of command centres engaged in surveillance and securing of territorial integrity and operations of surveillance and communication stations;
2) industrial, production, depot and repair workshop operations;
3) operations related to storage of national emergency supply materials;
4) military aviation and related operations;
5) vessel and stronghold operations and operations performed in naval ports;
6) experimental and research operations;
7) shooting and blasting operations;
8) military exercise and training operations;
9) operations related to serious disturbances in normal conditions.

Chapter 2 – General requirements concerning the organisation of waste management

Section 7
Packing and labelling of waste and information to be given on waste

Waste shall be packaged and labelled as necessary, and information shall be provided on it in such a way that the storage and transport of waste do not pose a hazard or harm to human health or the environment and that treatment may be arranged for the waste in accordance with its quality.
Section 8  
Packaging for hazardous waste

(1) Packaging for hazardous waste shall be secure and capable of being securely reclosed and must withstand the stress and load of normal use and movement, and of normal storage conditions. The packaging materials and the seal must not react with the hazardous waste in a way which can pose a hazard or harm to human health or the environment.

Section 9  
Labelling of hazardous waste

(1) The name of the waste holder and the waste itself shall be marked on hazardous waste packaging, together with any information and warnings necessary for the safety and appropriate organisation of waste management.

(2) When hazardous waste possesses any of the hazardous properties H 1–8, 10, 11 or 14 listed in annex 3, the substances contained in the waste that cause the waste to display the main hazardous properties must also be marked on the packaging and it must include warning labels in accordance with the Ministry of Social Affairs and Health Decree on chemical classification principles and labelling (807/2001). If the composition and properties of the waste do not fundamentally differ from the substance which is the main source of the waste, and if the waste is stored in the original packaging, the existing warning labels on the packaging can be used, provided that they are supplemented by information required under subsection 1.

(3) If the composition of the hazardous waste cannot reasonably be clarified, the packaging shall include the labelling “Myrkyllistä jätettä, koostumus tuntematon. Farliga avfall, sammansättningen obeckant” (Hazardous waste, composition unknown). In such a case, the warning label must contain the danger symbols ‘T’ (toxic) and ‘F’ (readily flammable) and the R phrases 11–23/24/25 and S phrases 1–3/7/9–36/37/39.

(4) The labels referred to in subsections 2 and 3 above need not be included on the packaging of hazardous waste if it is used solely for transporting the waste and has been labelled as required by the provisions and regulations issued concerning the transportation of dangerous substances, nor on packaging stored in a reception facility which is properly marked for purposes of safety.
Section 10
Collection of waste

(1) When organising the collection of municipal waste and comparable waste, the property holder, municipality, waste holder, producer, distributor and other party must ensure the following:

1) free access to the waste reception point and safe loading of waste for removal;
2) at the reception point, a sufficient number of lidded containers, deep collection containers embedded in the ground, dumpsters or other waste containers suitable for the waste types collected;
3) that the use and emptying of waste containers pose no danger of injury to the users or to those emptying them and no other hazard or harm to human health or the environment;
4) that a clearly distinguishable label is affixed to the lid or front side of the waste container, with information on the type of waste collected in each container, and the contact information of the company or organisation responsible for the collection;
5) that the waste container is emptied sufficiently often to leave enough room for the accumulated waste in the container, to allow the container to be kept closed at all times and to ensure that the waste does not cause contamination of the environment or littering or odours or other hygienic harm;
6) that the waste container is kept in good condition and cleaned sufficiently often to ensure that the collection causes no harm or hazard to human health or the environment;
7) that the reception point and its surroundings are cleaned of litter caused by waste collection, in accordance with chapter 8 of the Waste Act.

(2) Anyone delivering waste to the reception point is liable for ensuring that waste is placed in the waste container reserved for it and that the container is not damaged or does not become unnecessarily dirty due to the waste.

(3) The organiser of the reception point and waste carrier must ensure the timing of waste loading and other transport arrangements in such a way that said arrangements cause no nuisance, due to noise or other corresponding disturbances, to those residing in the vicinity of the reception point.

(4) The requirements provided above in subsections 1 to 3 shall be complied with, as applicable, in the collection of waste other than municipal and comparable waste.

Section 11
Transport of waste

Waste shall be transported in secure packaging or by closed means of transport. Waste may also be transported covered or in another manner, if it is possible to ensure that no waste is released into the environment during loading or transport, and that the waste does not pose an accident risk.
Section 12
Obligations concerning the sorting and other treatment of waste

(1) An operator engaged in the sorting or other treatment of waste on a professional basis or at an installation, must organise preparation of the waste for reuse, recycling or other recovery in accordance with section 8 of the Waste Act, so that the smallest possible portion of the treated waste ends up in disposal.

(2) Anyone recovering waste by putting or spreading it on the ground must use waste only in the amounts necessary for the purpose of levelling the soil structure and enhancing its bearing capacity and durability, or in a way that otherwise corresponds as far as possible to the need in question.

Section 13
Closure of a waste treatment facility or site

(1) After the termination of waste reception, a waste treatment facility or site, or part thereof, must, without delay, be rendered into such a condition that it does not pose a hazard or cause harm referred to in section 13(2) of the Waste Act.

(2) Further provisions on obligations after the termination of activity subject to an environmental permit are laid down in section 90 of the Environmental Protection Act (86/2000). Further provisions on closure of landfills are given in the Government decision on landfills (861/1997) and closure of a waste area for extractive waste in the Government decision on extractive waste (379/2008).

Chapter 3 – Special requirements concerning certain waste

Section 14
Separate collection and recycling of municipal waste

(1) The operator of an industrial, service or other business activity, any other waste holder, and municipalities are obliged, subject to the conditions laid down in sections 8, 13 and 15 of the Waste Act, to organise the separate collection and recycling of paper, cardboard, glass, metal, plastic and biowaste for which the operator is responsible.

(2) Provisions on the producer’s obligation to organise the separate collection and recycling of discarded paper products and paper, cardboard, glass, metal and plastic packaging are laid down in chapter 6 of the Waste Act and the provisions issued thereunder.

(3) The aim is that, by no later than from 1 January 2016, the measures referred to in subsection 1 and 2 account for a minimum of 50 per cent by weight of municipal waste recycled.
Section 15
Reducing the quantity and harmfulness of construction and demolition waste

A party engaging in a building project must ensure that the project is planned and implemented so that, in accordance with section 8 of the Waste Act, all usable items and substances are reclaimed and re-used and that the activity generates as little construction and demolition waste as possible, and that this waste is as harmless as possible.

Section 16
Separate collection and recovery of construction and demolition waste

(1) The holder of construction and demolition waste shall organise separate collection of waste so that the highest possible proportion of the waste can be prepared for re-use, or otherwise recycled or recovered in accordance with section 8 of the Waste Act. Subject to the preconditions provided in section 15 of the Waste Act, separate collection must in this case be organised for at least the following waste types:
   1) concrete, brick, mineral tile and ceramic waste;
   2) gypsum-based waste;
   3) non-impregnated wood waste;
   4) metal waste;
   5) glass waste;
   6) plastic waste;
   7) paper and cardboard waste;
   8) soil and waste rock material.

(2) Provisions on the producer’s obligation to organise separate collection and recycling of discarded packaging are laid down in chapter 6 of the Waste Act and the provisions issued thereunder.

(3) The aim is that, by 2020, the measures referred to in subsection 1 and 2 account for a minimum of 70 per cent by weight of construction and demolition waste recovered by means other than energy recovery or reprocessing into fuel, excluding soil and rock excavated from the bedrock or ground, and hazardous waste.

(4) Provisions on keeping hazardous waste separate and a ban on the mixing of hazardous waste are laid down in section 17 of the Waste Act.

Section 17
Oil waste

(1) Subject to the preconditions provided in sections 15 and 17 of the Waste Act, the waste holder shall organise the separate collection of different types of oil waste.

(2) Treatment of oil waste must be organised in accordance with sections 8 and 13 of the Waste Act. Additional provisions on the incineration of oil waste are given in the Government Decree on the incineration of waste (362/2003) and section 6 of the Government decision on management of oil waste (101/1997).
Section 18
Monitoring the quality of municipal wastewater sludge

The facility producing municipal wastewater sludge is responsible for ensuring that the quality of the sludge is specified in accordance with paragraph 1 of annex 5.

Section 19
Asbestos waste

(1) The waste holder must ensure that asbestos waste generated in operations is collected and transported, separately from other waste, for treatment without delay. Tightly closed durable packaging must be used for the storage and transport of asbestos waste, and package labelling must indicate that the packages contain asbestos. To prevent breakage, the containers must be handled cautiously and carefully.

(2) Provisions on the treatment of asbestos at landfills are given in the Government decree on landfills.

Chapter 4 – Keeping a record of waste, the shipping document and information to be provided to the authorities

Section 20
Records kept by the waste producer

(1) A record shall be kept, in chronological order, of any waste generated in the activities referred to in section 118(1)(4) of the Waste Act and of hazardous waste generated in the activities referred to in paragraph 2. Insofar as possible, records shall be kept by the place of business in question.

(2) Such records must include the following information:
   1) the quantity of waste;
   2) the waste entry in accordance with the list of waste and description of the type of waste and essential information on the properties and composition of the waste;
   3) in a case of hazardous waste, the main hazardous properties in accordance with annex 3;
   4) when the waste is delivered to another location for treatment, the name and contact information of the consignee and waste carrier and the method of waste treatment.

(3) The amount of specific waste, as referred to in section 119(1) of the Waste Act, shall be given as the total amount of waste and the amount of waste typical for the activities in question, in relation to a factor that, insofar as possible, describes the extent of said activities. Depending on the line of business, such factors include the number of person-years, net sales, production volume, number of inpatient days, number of overnight stays, and area of business premises.
Section 21
Keeping of records on municipal wastewater sludge and information to be provided to the supervisory authorities

(1) In addition to the provisions laid down in section 20 on records kept by the waste producer, the facility producing municipal wastewater sludge shall keep a record of information concerning the quality of the sludge, determined in accordance with section 18.

(2) By the end of February each year, the facility producing municipal wastewater sludge shall provide the supervisory authorities with the information referred to in annex 5, paragraph 2, on the sludge and the use thereof.

Section 22
Records kept by the operator of waste treatment operations

(1) Records in chronological order shall be kept of waste treated in activities referred to in section 118(1)(3) and (4) of the Waste Act. Insofar as possible, such records shall be kept by place of business.

(2) The records must include the following information:
   1) the quantity of waste;
   2) the waste entry in accordance with the list of waste and description of the type of waste, and essential information on its properties and composition;
   3) in the case of hazardous waste, the main hazardous properties in accordance with annex 3;
   4) if the waste is transported from another location, the name and contact information of the previous waste holder and waste carrier;
   5) the waste treatment method and classification of the treatment operation in accordance with annex 1 or 2;
   6) in the case of waste generated from the treatment of waste, information in accordance with section 20(2) as applicable.

Section 23
Records kept by the waste carrier, waste broker and waste collection operator

Records on waste transported, brokered or collected as part of the activities referred to in section 118(1)(5) of the Waste Act must contain the following information:
   1) the quantity of waste;
   2) the waste entry in accordance with the list of waste and the description of the type of waste, and essential information on the properties and composition of said waste;
   3) in the case of hazardous waste, the main hazardous properties in accordance with annex 3;
   4) the name and contact information of the property holder who delivered the waste, or the other waste holder;
   5) the dates of waste transport or waste reception and delivery;
   6) the name and contact information of the consignee of waste.
Section 24
Information to be given in the shipping document

(1) The shipping document referred to in section 121 of the Waste Act shall include the following information:
   1) the name and contact information of the waste producer or other waste holder, the waste carrier and consignee of waste;
   2) the time of shipment of waste and the origin and destination of the shipment;
   3) the waste entry in accordance with the list of waste and description of the type of waste;
   4) the quantity of waste;
   5) confirmation by the waste holder of the accuracy of the information provided;
   6) when the shipment of waste has ended, confirmation by the waste consignee of the reception of the waste, including information on the quantity of waste received.

(2) The shipping document on the shipment of hazardous waste shall also include the following information:
   1) the composition and physical characteristics of the waste and the main hazardous properties in accordance with annex 3;
   2) the type of packaging and means of transport of the waste;
   3) the waste treatment method.

Section 25
Plan on organising the monitoring and supervision of waste treatment

The plan on organising the monitoring and supervision of waste treatment, as referred to in section 120(2) of the Waste Act, shall include the following information:
   1) the waste approved for treatment;
   2) measures for inspecting the quality of waste received;
   3) a description of the treatment process, including a report of any disturbances, and dangerous and exceptional situations related to the treatment, and stages of treatment considered key in terms of monitoring;
   4) measures for arranging the supervision of emissions and waste generated from treatment;
   5) action to be taken in the case of disturbances, and dangerous and exceptional situations, including remedial measures;
   6) measures for analysing the quality of waste generated from treatment;
   7) treatment methods and locations of waste generated from treatment;
   8) the persons responsible for treatment and measures for their orientation and training;
   9) other corresponding issues necessary to the arrangement of monitoring and supervision.
Section 26
Information to be provided to the municipal waste management authority on waste transport from properties

(1) In accordance with section 39(2) of the Waste Act, the waste carrier shall provide the municipal waste management authority with the following information on all properties from which the carrier has collected waste during the monitoring period:
   1) the property holder’s name and contact information and the address of the property;
   2) the number and quantity of waste containers, by type of waste, included in the transport organised;
   3) the dates waste containers were emptied or the number of times waste containers were emptied and the interval between, by type of waste.

(2) The summary referred to in section 39(2) of the Waste Act shall include at least the following information:
   1) the quantity of waste collected from properties located within the municipality, by type of waste;
   2) the names and contact information of waste consignees and the quantity of waste delivered to each, by type of waste.

Chapter 5 – Approval and notification procedures
Section 27
Application for approval of activity in the waste management register

The application for the approval of activity in a waste management register referred to in section 94(1) of the Waste Act shall include:
   1) the operator’s name, contact information, Business ID (Business Identity Code) and domicile;
   2) the contact person’s name and contact information;
   3) a copy of a certificate of registration in the Trade Register, if the operations are subject to an entry in the Trade Register;
   4) information about the transport licence, if the operations are subject to a transport licence;
   5) a description of the means of transport and equipment;
   6) a description of the type and quality of the waste to be transported or brokered for treatment, and an estimate of the quantity transported or brokered annually, by type of waste;
   7) a description of the primary area of operation and other areas of operation;
   8) a description of the operator’s expertise;
   9) a description of the financial guarantee to be provided in accordance with section 95 of the Waste Act.
Section 28  
Contents of decision on approval in a waste management register

The decision on approval in a waste management register, as referred to in section 96 of the Waste Act, shall include at least the following information:

1) the operator’s name, contact information, Business ID (Business Identity Code) and domicile;
2) the contact person’s name and contact information;
3) essential information given in the application;
4) the decision on the approval or non-approval of the activity in a waste management register;
5) any preconditions issued;
6) a justification of the decision and information on the regulations applied.

Section 29  
Information to be included in the certificate of registration in a waste management register

The certificate of registration in a waste management register, as referred to in section 98 of the Waste Act, shall include at least the following information:

1) the operator’s name, contact information, Business ID (Business Identity Code) and domicile;
2) the contact person’s name and contact information;
3) the approval date of the decision and its identification information;
4) information on which authority made the decision, and its contact information;
5) the operating area, means of transport and equipment, and waste to which the approval applies;
6) regulations attached to the decision;
7) the date by which the certificate must be verified.

Section 30  
Notification of collection operations in a waste management register

(1) A notification for entry in a waste management register of the collection of waste conducted on a professional basis, in accordance with section 100 of the Waste Act, shall include:

1) the operator’s name, contact information and Business ID (Business Identity Code);
2) the contact person’s name and contact information;
3) a description of the type and quality of the waste to be collected, and an estimate of the quantity collected annually, by type of waste;
4) for collection other than a continuous operation, the estimated duration;
5) the address of the waste reception point or other corresponding information on the location of the reception point;
6) a description of the waste containers used at the reception point;
7) a description of the organisation for waste collection in accordance with section 10;
8) a description of the transport of waste for treatment and the planned method and location of waste treatment.

(2) Information on all waste reception points located in the municipality, covered by collection organised by the operator, may be included in one and the same notification.

(3) The operator must notify the municipal environmental protection authority without delay of any essential changes in the information referred to in subsection 1, or if the operations are terminated.

Section 31
Contents of an application for pre-consent to a waste recovery facility

An application for pre-consent to a waste recovery facility, as referred to in section 114 of the Waste Act, shall include the following information:

1) the operator’s name, Business ID (Business Identity Code), contact information and contact person, as well as the name of the facility and visiting address;

2) a copy of a certificate of registration in the Trade Register, if the operations are subject to an entry in the Trade Register;

3) information on a valid environmental permit and an environmental management system referred to in section 114(2)(3) of the Waste Act;

4) a description of the waste for which pre-consent is applied, including the physical characteristics of the waste and impurities and variations in its properties;

5) a waste entry in accordance with the list of waste and the waste classification in accordance with Annexes IV and IVA of Regulation (EC) No 1013/2006 of the European Parliament and of the Council on shipments of waste;

6) a description of the recovery method used, including classification of the recovery operation in accordance with annex 1;

7) the total quantity of waste recovered annually by the facility and quantities by type of waste, and an assessment of the proportion of waste imported on the basis of pre-consent;

8) the period for which pre-consent is applied;

9) waste quality assurance, records kept of waste and measures in case the composition of waste is unacceptable or for another reason, and other arrangements for the reception of waste;

10) a report of any problems in previous shipments of waste in which the operator participated, and of how these problems were solved.

Chapter 6 – Miscellaneous provisions

Section 32
Duties of the Finnish Environment Institute

In addition to the provisions laid down in the Waste Act, the Finnish Environment Institute shall

1) engage in research on and monitoring of reducing the quantity and harmfulness of waste and research on waste management, and shall arrange the related training, advisory services and communication;
2) participate in the preparation of the national waste plan and provisions issued under the Waste Act and instructions on waste issues;
3) participate in the development of quality assurance of data on waste, recorded in the environmental protection database referred to in section 27 of the Environmental Protection Act.

Section 33
Duties of the Centres for Economic Development, Transport and the Environment

In addition to the provisions laid down in the Waste Act, the Centres for Economic Development, Transport and the Environment shall
1) ensure quality assurance of any data on waste they have recorded in the environmental protection database;
2) collect and acquire information on waste and waste management within their areas of operation;
3) ensure that training, advisory services, communication and monitoring are organised on waste and waste management within their areas of operation.

Section 34
Expert authorities and institutions

Within their mandates, expert authorities and institutions referred to in section 27 of the Waste Act include the National Institute for Health and Welfare, the Finnish Food Safety Authority Evira, Customs, VTT Technical Research Centre of Finland and the Finnish Environment Institute.

Section 35
Contents of the national waste plan

(1) The national waste plan referred to in section 87 of the Waste Act shall include the following information:
1) the quantity, type and source of waste generated within the country and an evaluation of the future trends of these;
2) a general description of waste collection and treatment systems and the allocation of responsibilities between municipal and private actors, including any special arrangements for hazardous and other waste, and major waste recovery and disposal installations;
3) conclusions on the implementation of the valid national waste plan and on the assessment of its effectiveness;
4) goals for the development of waste management, which shall, insofar as possible, include quantitative targets for recycling and other recovery of waste;
5) a general assessment of the need to modernise the systems and facilities referred to in paragraph 2, the need for new treatment facilities, the quantities of waste processed by them, and the related investment and other costs, and a description of the location criteria for these installations;
6) any other measures planned in order to solve recognised problems, including measures for organising necessary awareness campaigns and providing information;
7) an evaluation of the usefulness and suitability of the use of economic and other instruments in tackling various waste problems, taking account of the need to maintain the smooth functioning of the internal market;
8) an evaluation of the effectiveness of the measures proposed in the plan in reaching the objectives set therein, and in fulfilling the intent of the Waste Act and promoting the implementation of provisions.

(2) The section of the national waste plan on reducing the quantity and harmfulness of waste must include the following information:
1) a description of trends in the quantity and harmfulness of waste generated for a period covering at least the last ten years, and an estimate of future trends;
2) a description of current measures for reducing the quantity and harmfulness of waste;
3) objectives for reducing the quantity and harmfulness of waste;
4) planned measures for promoting the reduction of waste quantity and harmfulness, taking account of the examples of waste prevention measures included in Annex IV of Directive 2008/98/EC of the European Parliament and of the Council on waste, hereinafter the Waste Directive, and an evaluation of the usefulness of the measures in attaining the objectives related to a reduction in the quantity and harmfulness of waste;
5) qualitative and quantitative benchmarks for monitoring the progress of measures to reduce the quantity and harmfulness of waste.

(3) The national waste plan shall include a section on packaging and packaging waste, where it shall be examined how to achieve the goals, set under the Waste Act, for reducing the quantity of packaging, and for re-use and recycling and other recovery of packaging waste.

Section 36
Contents of the regional waste plan

The regional waste plan referred to in section 88 of the Waste Act shall include the following information regarding the area covered by the plan:
1) the quantity of municipal waste generated and treated in the area, and the quantity of other waste considered key in terms of waste management in the region, and an assessment of the trends of these in the future;
2) a description of the organisation of waste collection and treatment referred to in paragraph 1;
3) waste recovery and disposal facilities operating in the region, alongside establishments and corporations organising the re-use of products;
4) conclusions on the implementation of the valid regional waste plan and on the assessment of its effectiveness;
5) objectives regarding the reduction of the quantity and harmfulness of waste and development of waste management, which shall, insofar as possible, include quantitative goals for these;
6) an assessment of the need for reforming the organisation of activities and modernising the facilities referred to in paragraphs 2 and 3, and of the need for new treatment facilities and of the quantity of waste treated by them and the location criteria for these installations;
7) waste which is causing particular waste management problems in the region and measures planned for solving these problems, including measures for organising necessary awareness campaigns and providing information;
8) any decommissioned landfills and other corresponding waste treatment areas located in the region that are assessed as causing a hazard or harm to the environment or human health, and measures planned for their restoration;
9) measures planned for implementation in the region to promote the reduction of the quantity and harmfulness of waste, taking into account the measures included in Annex IV of the Waste Directive.

Section 37
Entry into force

(1) This Decree enters into force on 1 May 2012.

(2) This Degree repeals the Government Decision on information to be provided on hazardous waste and on the packing and labelling of hazardous waste (659/1996), the Government Decision on management of oil waste, excluding section 6 thereof, the Government Decision on construction waste (295/1997), the Government Decision on the use of sewage sludge in agriculture (282/1994), and the Ministry of the Environment Decree on the list of the most common wastes and of hazardous wastes (1129/2001).
Annex 1

RECOVERY OPERATIONS

R 1 Use principally as a fuel or other means of generating energy 1)
R 2 Solvent reclamation or regeneration
R 3 Recycling or reclamation of organic substances which are not used as solvents, including composting and other biological transformation processes 2)
R 4 Recycling or reclamation of metals and metal compounds
R 5 Recycling or reclamation of other inorganic materials 3)
R 6 Regeneration of acids or bases
R 7 Recovery of components used for pollution abatement
R 8 Recovery of components from catalysts
R 9 Oil re-refining or other reuses of oil
R 10 Land treatment resulting in benefit to agriculture or ecological improvement
R 11 Use of waste obtained from any of the operations numbered R 1 to R 10
R 12 Exchange of waste for submission to any of the operations numbered R 1 to R 11 4)
R 13 Storage of waste pending any of the operations numbered R 1 to R 12, excluding temporary storage, pending collection, on the site where the waste is produced 5)

1) This applies to incineration facilities dedicated to the processing of municipal solid waste only where their energy efficiency is equal to or above 0.65. Energy efficiency is calculated using the following formula:

\[
\text{Energy efficiency} = \frac{(E_p - (E_f + E_i))}{(0.97 \times (E_w + E_f))}
\]

- \(E_p\) means annual energy produced as heat or electricity.\(E_p\) is calculated with energy in the form of electricity being multiplied by 2.6 and heat produced for commercial use multiplied by 1.1 (GJ/year)

- \(E_f\) means annual energy input to the system from fuels contributing to the production of steam (GJ/year).

- \(E_w\) means annual energy contained in the treated waste calculated using the net calorific value of the waste (GJ/year).

- \(E_i\) means annual energy imported excluding \(E_w\) and \(E_f\) (GJ/year).

- 0.97 is a factor accounting for energy losses due to bottom ash and radiation.

This formula shall be applied in accordance with the reference document on Best Available Techniques for waste incineration.

2) This includes gasification and pyrolysis using the generated components as chemicals.

3) This includes recycling of inorganic construction materials and soil cleaning, resulting in recovery of the soil.

4) If there is no other R code appropriate, this can include preliminary operations prior to the recovery of waste, including pre-processing such as, inter alia, dismantling, sorting,
crushing, compacting, pelletising, drying, shredding, conditioning, repackaging, separating, blending or mixing prior to submission to any of the operations numbered R1 to R11.

5) Temporary storage means temporary storage of waste referred to in section 6(1)(10) of the Waste Act.

Annex 2

DISPOSAL OPERATIONS

D 1 Deposit into or on to land, e.g. a landfill
D 2 Land treatment, e.g. biodegradation of liquid or sludgy discards in soil
D 3 Deep injection, e.g. injection of pumpable discards into wells, salt domes or naturally occurring repositories
D 4 Surface impoundment, e.g. placement of liquid or sludgy discards into pits, ponds or lagoons
D 5 Specially engineered landfill, e.g. placement into lined discrete cells which are capped and isolated from one another and the environment
D 6 Release into a water body, except seas or oceans
D 7 Release into seas or oceans, including sea-bed insertion
D 8 Biological treatment not specified elsewhere in this annex, which results in final compounds or mixtures which are discarded by means of any of the operations numbered D 1 to D 12
D 9 Physico-chemical treatment not specified elsewhere in this annex, which results in final compounds or mixtures which are discarded by means of any of the operations numbered D 1 to D 12, e.g. evaporation, drying or calcination
D 10 Incineration on land
D 11 Incineration at sea 1)
D 12 Permanent storage, e.g. emplacement of containers in a mine
D 13 Blending or mixing prior to submission to any of the operations numbered D 1 to D 12 2)
D 14 Repackaging prior to submission to any of the operations numbered D 1 to D 13
D 15 Storage pending any of the operations numbered D 1 to D 14, excluding temporary storage, pending collection, on the site where the waste is produced 3)

1) Such operations are prohibited by Finnish and EU legislation and international conventions.
2) If no other appropriate D code is available, this can include preliminary operations prior to disposal, including pre-processing such as, inter alia, sorting, crushing, compacting, pelletising, drying, shredding, conditioning or separating prior to submission to any of the operations numbered D1 to D12.
3) Temporary storage means temporary storage of waste referred to in section 6(1)(10) of the Waste Act.
Annex 3

HAZARDOUS PROPERTIES OF WASTE AND THE LIMIT VALUES APPLIED WHEN INTERPRETING WASTE PROPERTIES

1. Hazardous properties of waste

H 1 Explosive: substances and preparations which may explode under the effect of a flame or which are more sensitive to shocks or friction than dinitrobenzene.

H 2 Oxidising: substances and preparations which exhibit highly exothermic reactions when in contact with other substances, particularly flammable substances.

H 3-A Highly flammable:

- liquid substances and preparations having a flash point below 21 °C, including extremely flammable liquids,

- substances and preparations which may become hot and finally catch fire in contact with air at ambient temperature, without any application of energy,

- solid substances and preparations which may readily catch fire after brief contact with a source of ignition and which continue to burn or to be consumed after the removal of the source of ignition,

- gaseous substances and preparations which are flammable in air at normal pressure, or

- substances and preparations which, in contact with water or damp air, evolve highly flammable gases in dangerous quantities.

H 3-B Flammable: liquid substances and preparations having a flash point equal to or greater than 21 °C and less than or equal to 55 °C.

H 4 Irritant: non-corrosive substances and preparations which, through immediate, prolonged or repeated contact with the skin or mucous membrane, can cause inflammation.

H 5 Harmful: substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may involve limited health risks.
**H 6 Toxic:** substances and preparations, including very toxic substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may involve serious, acute or chronic health risks and even death.

**H 7 Carcinogenic:** substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce cancer or increase its incidence.

**H 8 Corrosive:** substances and preparations which may destroy living tissue on contact.

**H 9 Infectious:** substances and preparations containing viable micro-organisms or their toxins which are known or reliably believed to cause disease in humans or other living organisms.

**H 10 Toxic for reproduction:** substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce non-hereditary congenital malformations or increase their incidence.

**H 11 Mutagenic:** substances and preparations which, if they are inhaled or ingested or if they penetrate the skin, may induce hereditary genetic defects or increase their incidence.

**H 12 Waste which releases toxic or very toxic gases in contact with water, air or an acid.**

**H 13 Sensitising:** substances and preparations which, if they are inhaled or if they penetrate the skin, are capable of eliciting a hypersensitisation reaction such that, upon further exposure to the substance or preparation, characteristic adverse effects result. *

**H 14 Ecotoxic:** waste which presents or may present immediate or delayed risks for the environment.

**H 15 Waste capable by any means, after disposal, of yielding another substance, e.g. a leachate, which possesses any of the characteristics listed above.**

The provisions laid down in the Ministry of Social Affairs and Health Decree on chemical classification principles and labelling apply to the interpretation of properties H 1, H 2, H 3-A, H 3-B, H 4, H 5, H 6, H 7, H 8, H 10 and H 11, and the classification of substances.

* As far as testing methods are available.

2. Limit values applicable in the interpretation of properties H 4, H 5, H 6, H 7, H 8, H 10 and H 11

Waste is considered to possess one or several of the properties H 4, H 5, H 6, H 7, H 8, H 10 and H 11 referred to in paragraph 1 of this annex, if the concentration of the substance in waste (expressed as per cent by weight) is equal to or higher than the limit value given in the table below. Limit values do not apply to pure alloys uncontaminated by hazardous substances. If Table 3.2 in Annex VI of the CLP Regulation gives a lower limit value for a substance, that limit value shall apply.

*) If waste contains more than one substance classified as hazardous, the Ministry of Social Affairs and Health Decree on chemical classification principles and labelling shall apply when calculating total [OR aggregate] concentrations.
Annex 4

LIST OF WASTE: THE MOST COMMON WASTES AND HAZARDOUS WASTES

Introduction

This list of waste contains examples of wastes. It is not a comprehensive list, and not all objects or substances mentioned on it are considered waste in every case. An object or substance is considered waste only if it fulfils the criteria for waste laid down in section 5(1) of the Waste Act.

Entries marked with an asterisk (*) on the list are hazardous waste, unless otherwise decided with respect to that particular item under section 7 or 112 of the Waste Act.

Some entries on the list include references to dangerous substances contained in the waste. Waste is classified under such an entry only if the substances contained in it occur in concentrations that give the waste one or more of the properties listed in annex 3 of this Decree.

The limit values referred to in annex 3 of this Decree are not applicable to pure metal alloys that are uncontaminated by dangerous substances. Metal alloys mentioned separately on this list and indicated by an asterisk (*) are nevertheless classified as hazardous waste.

For this list:
1) dangerous substance refers to a dangerous chemical as defined in section 11 of the Chemicals Act;
2) PCBs refers to polychlorinated biphenyls, polychlorinated triphenyls, monomethyltetrachlorodiphenylmethane, monomethylchlordiphenylmethane and monomethylbromodiphenylmethane and mixtures containing a total of more than 0.005 per cent by weight of these substances;
3) heavy metal refers to all antimony, arsenic, cadmium, chromium(VI), copper, lead, mercury, nickel, selenium, tellurium, thallium and tin compounds, as well as these materials in metallic form, provided that these compounds or substances are classified as dangerous substances under subparagraph 1.

The list consists of waste entries identified by a six-digit code and chapter headings identified by two- or four-digit codes. Individual waste items must not be viewed separately from their chapter heading. Waste is identified according to the list as follows:
1) Waste items indicated by a six-digit code corresponding to the origin, type and quality of waste, excluding the items ending in the ‘99’ code, can be found in Chapters 01–12 or 17–20. Certain production units may have to categorise their operations under several different chapters. Separately collected packaging waste, including mixed packaging waste, is nevertheless always categorised under Chapter 15–01.
2) If an appropriate item cannot be found for identifying the waste mentioned in Chapters 01–12 or 17–20, Chapters 13, 14 and 15 should be applied next.
3) If none of the items in the above chapters are appropriate for identifying the waste in question, the waste is categorised under Chapter 16.
4) If the waste does not fall under Chapter 16 either, the 99 code (wastes not otherwise specified) referred to in subparagraph 1 above must be applied.

Index

Chapters of the list

01 Wastes resulting from exploration, mining, quarrying, physical and chemical treatment of minerals
02 Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing, food preparation and processing
03 Wastes from wood processing and the production of panels and furniture, pulp, paper and cardboard
04 Wastes from the leather, fur and textile industries
05 Wastes from petroleum refining, natural gas purification and pyrolytic treatment of coal
06 Wastes from inorganic chemical processes
07 Wastes from organic chemical processes
08 Wastes from the manufacture, formulation, supply and use (MFSU) of coatings (paints, varnishes and vitreous enamels), adhesives, sealants and printing inks
09 Wastes from the photographic industry
10 Wastes from thermal processes
11 Wastes from chemical surface treatment and coating of metals and other materials; non-ferrous hydro-metallurgy
12 Wastes from shaping and physical and mechanical surface treatment of metals and plastics
13 Oil wastes and wastes of liquid fuels (except edible oils, 05 and 12)
14 Waste organic solvents, refrigerants and propellants (except 07 and 08)
15 Waste packaging; absorbents, wiping cloths, filter materials and protective clothing not otherwise specified
16 Wastes not otherwise specified in the list
17 Construction and demolition wastes (including excavated soil from contaminated sites)
18 Wastes from human or animal health care and/or related research (except kitchen and restaurant wastes not arising from immediate health care)
19 Wastes from waste management facilities, off-site waste water treatment plants and the preparation of water intended for human consumption and water for industrial use
20 Municipal wastes (household waste and similar commercial, industrial and institutional wastes) including separately collected fractions

02  WASTES FROM AGRICULTURE, HORTICULTURE, AQUACULTURE, FORESTRY, HUNTING AND FISHING, FOOD PREPARATION AND PROCESSING

02 01  wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing
   02 01 01  sludges from washing and cleaning
   02 01 02  animal-tissue waste
   02 01 03  plant-tissue waste
   02 01 04  waste plastics (except packaging)
   02 01 05  animal faeces, urine and manure (including spoiled straw), effluent, collected separately and treated off-site
   02 01 07  wastes from forestry
   02 01 08* agrochemical waste containing dangerous substances
   02 01 09  agrochemical waste other than those mentioned in 02 01 08
   02 01 10  waste metal
   02 01 99  wastes not otherwise specified

02 02  wastes from the preparation and processing of meat, fish and other foods of animal origin
   02 02 01  sludges from washing and cleaning
   02 02 02  animal-tissue waste
   02 02 03  materials unsuitable for consumption or processing
   02 02 04  sludges from on-site effluent treatment
   02 02 99  wastes not otherwise specified

02 03  wastes from fruit, vegetables, cereals, edible oils, cocoa, coffee, tea and tobacco preparation and processing; conserve production; yeast and yeast extract production, molasses preparation and fermentation
   02 03 01  sludges from washing, cleaning, peeling, centrifuging and separation
   02 03 02  wastes from preserving agents
   02 03 03  wastes from solvent extraction
   02 03 04  materials unsuitable for consumption or processing
   02 03 05  sludges from on-site effluent treatment
   02 03 99  wastes not otherwise specified

02 04  wastes from sugar processing
   02 04 01  soil from cleaning and washing beet
   02 04 02  off-specification calcium carbonate
   02 04 03  sludges from on-site effluent treatment
   02 04 99  wastes not otherwise specified

02 05  wastes from the dairy products industry
   02 05 01  materials unsuitable for consumption or processing
   02 05 02  sludges from on-site effluent treatment
   02 05 99  wastes not otherwise specified

02 06  wastes from the baking and confectionery industry
02 06 01 materials unsuitable for consumption or processing
02 06 02 wastes from preserving agents
02 06 03 sludges from on-site effluent treatment
02 06 99 wastes not otherwise specified

02 07 wastes from the production of alcoholic and non-alcoholic beverages (except coffee, tea and cocoa)
02 07 01 wastes from washing, cleaning and mechanical reduction of raw materials
02 07 02 wastes from spirits distillation
02 07 03 wastes from chemical treatment
02 07 04 materials unsuitable for consumption or processing
02 07 05 sludges from on-site effluent treatment
02 07 99 wastes not otherwise specified

03 WASTES FROM WOOD PROCESSING AND THE PRODUCTION OF PANELS AND FURNITURE, PULP, PAPER AND CARDBOARD

03 01 wastes from wood processing and the production of panels and furniture
03 01 01 waste bark and cork
03 01 04* sawdust, shavings, cuttings, wood and wood based boards (like particle board and veneer) containing dangerous substances
03 01 05 sawdust, shavings, cuttings, wood and wood based boards (like particle board and veneer) other than those mentioned in 03 01 04
03 01 99 wastes not otherwise specified

03 02 wastes from wood preservation
03 02 01* non-halogenated organic wood preservatives
03 02 02* organochlorinated wood preservatives
03 02 03* organometallic wood preservatives
03 02 04* inorganic wood preservatives
03 02 05* other wood preservatives containing dangerous substances
03 02 99 wood preservatives not otherwise specified

03 03 wastes from pulp, paper and cardboard production and processing
03 03 01 waste bark and wood
03 03 02 green liquor sludge (from recovery of cooking liquor)
03 03 05 de-inking sludges from paper recycling
03 03 07 mechanically separated rejects from pulping of waste paper and cardboard
03 03 08 wastes from sorting of paper and cardboard destined for recycling
03 03 09 lime mud waste
03 03 10 fibre rejects, fibre-, filler- and coating-sludges from mechanical separation
03 03 11 sludges from on-site effluent treatment other than those mentioned in 03 03 10
03 03 99 wastes not otherwise specified

04 WASTES FROM THE LEATHER, FUR AND TEXTILE INDUSTRIES

04 01 wastes from the leather and fur industry
04 01 01 fleshings and lime split wastes
04 01 02 liming waste
04 01 03* degreasing wastes containing solvents without a liquid phase
04 01 04 tanning liquor containing chromium
04 01 05 tanning liquor free of chromium
04 01 06 sludges, in particular from on-site effluent treatment containing chromium
04 01 07 sludges, in particular from on-site effluent treatment free of chromium
04 01 08 waste tanned leather (blue sheetings, shavings, cuttings, buffing dust) containing chromium
04 01 09 wastes from dressing and finishing
04 01 99 wastes not otherwise specified

04 02 wastes from the textile industry
04 02 09 wastes from composite materials (impregnated textile, elastomer, plastomer)
04 02 10 organic matter from natural products (for example grease, wax)
04 02 14* wastes from finishing containing organic solvents
04 02 15 wastes from finishing other than those mentioned in 04 02 14
04 02 16* dyestuffs and pigments containing dangerous substances
04 02 17 dyestuffs and pigments other than those mentioned in 04 02 16
04 02 19* sludges from on-site effluent treatment containing dangerous substances
04 02 20 sludges from on-site effluent treatment other than those mentioned in 04 02 19
04 02 21 wastes from unprocessed textile fibres
04 02 22 wastes from processed textile fibres
04 02 99 wastes not otherwise specified

05 WASTES FROM PETROLEUM REFINING, NATURAL GAS PURIFICATION AND PYROLYTIC TREATMENT OF COAL

05 01 wastes from petroleum refining
05 01 02* desalter sludges
05 01 03* tank bottom sludges
05 01 04* acid alkyl sludges
05 01 05* oil spills
05 01 06* oily sludges from maintenance operations of the plant or equipment
05 01 07* acid tars
05 01 08* other tars
05 01 09* sludges from on-site effluent treatment containing dangerous substances
05 01 10 sludges from on-site effluent treatment other than those mentioned in 05 01 09
05 01 11* wastes from cleaning of fuels with bases
05 01 12* oil containing acids
05 01 13 boiler feedwater sludges
05 01 14 wastes from cooling columns
05 01 15* spent filter clays
05 01 16 sulphur-containing wastes from petroleum desulphurisation
05 01 17 bitumen
05 01 99 wastes not otherwise specified

05 06 wastes from the pyrolytic treatment of coal
05 06 01* acid tars
05 06 03* other tars

06 07 04* solutions and acids, for example contact acid
06 07 99 wastes not otherwise specified

06 08 wastes from the MFSU of silicon and silicon derivatives
06 08 02* wastes containing dangerous silicones
06 08 99 wastes not otherwise specified

06 09 wastes from the MSFU of phosphorous chemicals and phosphorous chemical processes
06 09 02 phosphorous slag
06 09 03* calcium-based reaction wastes containing or contaminated with dangerous substances
06 09 04 calcium-based reaction wastes other than those mentioned in 06 09 03
06 09 99 wastes not otherwise specified

06 10 wastes from the MFSU of nitrogen chemicals, nitrogen chemical processes and fertiliser manufacture
06 10 02* wastes containing dangerous substances
06 10 99 wastes not otherwise specified

06 11 wastes from the manufacture of inorganic pigments and opacifiers
06 11 01 calcium-based reaction wastes from titanium dioxide production
06 11 99 wastes not otherwise specified

06 13 wastes from inorganic chemical processes not otherwise specified
06 13 01* inorganic plant protection products, wood-preserving agents and other biocides.
06 13 02* spent activated carbon (except 06 07 02)
06 13 03 carbon black
06 13 04* wastes from asbestos processing
06 13 05* soot
06 13 99 wastes not otherwise specified

07 WASTES FROM ORGANIC CHEMICAL PROCESSES

07 01 wastes from the manufacture, formulation, supply and use (MFSU) of basic organic chemicals
07 01 01* aqueous washing liquids and mother liquors
07 01 03* organic halogenated solvents, washing liquids and mother liquors
07 01 04* other organic solvents, washing liquids and mother liquors
07 01 07* halogenated still bottoms and reaction residues
07 01 08* other still bottoms and reaction residues
07 01 09* halogenated filter cakes and spent absorbents
07 01 10* other filter cakes and spent absorbents
07 01 11* sludges from on-site effluent treatment containing dangerous substances
07 01 12 sludges from on-site effluent treatment other than those mentioned in 07 01 11
07 01 99 wastes not otherwise specified

07 02 wastes from the MFSU of plastics, synthetic rubber and man-made fibres
07 02 01* aqueous washing liquids and mother liquors
07 02 03* organic halogenated solvents, washing liquids and mother liquors
07 02 04* other organic solvents, washing liquids and mother liquors
07 02 07* halogenated still bottoms and reaction residues
07 02 08* other still bottoms and reaction residues
07 02 09* halogenated filter cakes and spent absorbents
07 02 10* other filter cakes and spent absorbents
07 02 11* sludges from on-site effluent treatment containing dangerous substances
07 02 12 sludges from on-site effluent treatment other than those mentioned in 07 02 11
07 02 13 waste plastic
07 02 14* wastes from additives containing dangerous substances
07 02 15 wastes from additives other than those mentioned in 07 02 14
07 02 16* wastes containing dangerous silicones
07 02 17 wastes containing silicones other than those mentioned in 07 02 16
07 02 99 wastes not otherwise specified

07 03 wastes from the MFSU of organic dyes and pigments (except 06 11)
07 03 01* aqueous washing liquids and mother liquors
07 03 03* organic halogenated solvents, washing liquids and mother liquors
07 03 04* other organic solvents, washing liquids and mother liquors
07 03 07* halogenated still bottoms and reaction residues
07 03 08* other still bottoms and reaction residues
07 03 09* halogenated filter cakes and spent absorbents
07 03 10* other filter cakes and spent absorbents
07 03 11* sludges from on-site effluent treatment containing dangerous substances
07 03 12 sludges from on-site effluent treatment other than those mentioned in 07 03 11
07 03 99 wastes not otherwise specified

07 04 wastes from the MFSU of organic plant protection products (except 02 01 08 and 02 01 09), wood preserving agents (except 03 02) and other biocides
07 04 01* aqueous washing liquids and mother liquors
07 04 03* organic halogenated solvents, washing liquids and mother liquors
07 04 04* other organic solvents, washing liquids and mother liquors
07 04 07* halogenated still bottoms and reaction residues
07 04 08* other still bottoms and reaction residues
07 04 09* halogenated filter cakes and spent absorbents
07 04 10* other filter cakes and spent absorbents
07 04 11* sludges from on-site effluent treatment containing dangerous substances
07 04 12 sludges from on-site effluent treatment other than those mentioned in 07 04 11
07 04 13* solid wastes containing dangerous substances
07 04 99 wastes not otherwise specified
07 05 wastes from the MFSU of pharmaceuticals
07 05 01* aqueous washing liquids and mother liquors
07 05 03* organic halogenated solvents, washing liquids and mother liquors
07 05 04* other organic solvents, washing liquids and mother liquors
07 05 07* halogenated still bottoms and reaction residues
07 05 08* other still bottoms and reaction residues
07 05 09* halogenated filter cakes and spent absorbents
07 05 10* other filter cakes and spent absorbents
07 05 11* sludges from on-site effluent treatment containing dangerous substances
07 05 12 sludges from on-site effluent treatment other than those mentioned in 07 05 11
07 05 13* solid wastes containing dangerous substances
07 05 14 solid wastes other than those mentioned in 07 05 13
07 05 99 wastes not otherwise specified

07 06 wastes from the MFSU of fats, grease, soaps, detergents, disinfectants and cosmetics
07 06 01* aqueous washing liquids and mother liquors
07 06 03* organic halogenated solvents, washing liquids and mother liquors
07 06 04* other organic solvents, washing liquids and mother liquors
07 06 07* halogenated still bottoms and reaction residues
07 06 08* other still bottoms and reaction residues
07 06 09* halogenated filter cakes and spent absorbents
07 06 10* other filter cakes and spent absorbents
07 06 11* sludges from on-site effluent treatment containing dangerous substances
07 06 12 sludges from on-site effluent treatment other than those mentioned in 07 06 11
07 06 99 wastes not otherwise specified

07 07 wastes from the MFSU of fine chemicals and chemical products not otherwise specified
07 07 01* aqueous washing liquids and mother liquors
07 07 03* organic halogenated solvents, washing liquids and mother liquors
07 07 04* other organic solvents, washing liquids and mother liquors
07 07 07* halogenated still bottoms and reaction residues
07 07 08* other still bottoms and reaction residues
07 07 09* halogenated filter cakes and spent absorbents
07 07 10* other filter cakes and spent absorbents
07 07 11* sludges from on-site effluent treatment containing dangerous substances
07 07 12 sludges from on-site effluent treatment other than those mentioned in 07 07 11
07 07 99 wastes not otherwise specified

08 WASTES FROM THE MANUFACTURE, FORMULATION, SUPPLY AND USE (MFSU) OF COATINGS (PAINTS, VARNISHES AND VITREOUS ENAMELS), ADHESIVES, SEALANTS AND PRINTING INKS

08 01 wastes from MFSU and removal of paint and varnish
08 01 11* waste paint and varnish containing organic solvents or other dangerous substances
08 01 12 waste paint and varnish other than those mentioned in 08 01 11

10 13 01  waste preparation mixture before thermal processing
10 13 04  wastes from calcination and hydration of lime
10 13 06  particulates and dust (except 10 13 12 and 10 13 13)
10 13 07  sludges and filter cakes from gas treatment
10 13 09* wastes from asbestos-cement manufacture containing asbestos
10 13 10  wastes from asbestos-cement manufacture other than those mentioned in 10 13 09
10 13 11  wastes from cement-based composite materials other than those mentioned in 10 13 09 and 10 13 10
10 13 12* solid wastes from gas treatment containing dangerous substances
10 13 13  solid wastes from gas treatment other than those mentioned in 10 13 12
10 13 14  waste concrete and concrete sludge
10 13 99  wastes not otherwise specified

10 14  waste from crematoria
10 14 01* waste from gas cleaning containing mercury

11  WASTES FROM CHEMICAL SURFACE TREATMENT AND COATING OF METALS AND OTHER MATERIALS; NON-FERROUS HYDRO-METALLURGY

11 01  wastes from chemical surface treatment and coating of metals and other materials (for example galvanic processes, zinc coating processes, pickling processes, etching, phosphating, alkaline degreasing, anodising)
11 01 05* pickling acids
11 01 06* acids not otherwise specified
11 01 07* pickling bases
11 01 08* phosphatising sludges
11 01 09* sludges and filter cakes containing dangerous substances
11 01 10  sludges and filter cakes other than those mentioned in 11 01 09
11 01 11* aqueous rinsing liquids containing dangerous substances
11 01 12  aqueous rinsing liquids other than those mentioned in 11 01 11
11 01 13* degreasing wastes containing dangerous substances
11 01 14  degreasing wastes other than those mentioned in 11 01 13
11 01 15* eluate and sludges from membrane systems or ion exchange systems containing dangerous substances
11 01 16* saturated or spent ion exchange resins
11 01 98* other wastes containing dangerous substances
11 01 99 wastes not otherwise specified

11 02 wastes from non-ferrous hydrometallurgical processes
11 02 02* sludges from zinc hydrometallurgy (including jarosite, goethite)
11 02 03 wastes from the production of anodes for aqueous electrolytical processes
11 02 05* wastes from copper hydrometallurgical processes containing dangerous substances
11 02 06 wastes from copper hydrometallurgical processes other than those mentioned in 11 02 05
11 02 07* other wastes containing dangerous substances
11 02 99 wastes not otherwise specified

11 03 sludges and solids from tempering processes
11 03 01* wastes containing cyanide
11 03 02* other wastes

11 05 wastes from hot galvanising processes
11 05 01 hard zinc
11 05 02 zinc ash
11 05 03* solid wastes from gas treatment
11 05 04* spent flux
11 05 99 wastes not otherwise specified

12 WASTES FROM SHAPING AND PHYSICAL AND MECHANICAL SURFACE TREATMENT OF METALS AND PLASTICS

12 01 wastes from shaping and physical and mechanical surface treatment of metals and plastics
12 01 01 ferrous metal filings and turnings
12 01 02 ferrous metal dust and particles
12 01 03 non-ferrous metal filings and turnings
12 01 04 non-ferrous metal dust and particles
12 01 05 plastics shavings and turnings
12 01 06* mineral-based machining oils containing halogens (except emulsions and solutions)
12 01 07* mineral-based machining oils free of halogens (except emulsions and solutions)
12 01 08* machining emulsions and solutions containing halogens
12 01 09* machining emulsions and solutions free of halogens
12 01 10* synthetic machining oils
12 01 12* spent waxes and fats
12 01 13 welding wastes
12 01 14* machining sludges containing dangerous substances
12 01 15 machining sludges other than those mentioned in 12 01 14
12 01 16* waste blasting material containing dangerous substances
12 01 17 waste blasting material other than those mentioned in 12 01 16
12 01 18* metal sludge (grinding, honing and lapping sludge) containing oil
12 01 19* readily biodegradable machining oil
12 01 20* spent grinding bodies and grinding materials containing dangerous substances
12 01 21 spent grinding bodies and grinding materials other than those mentioned in 12 01 20
12 01 99 wastes not otherwise specified

12 03 wastes from water and steam degreasing processes (except 11)
12 03 01* aqueous washing liquids
12 03 02* steam degreasing wastes

13 OIL WASTES AND WASTES OF LIQUID FUELS (except edible oils, and those in chapters 05, 12 and 19)

13 01 waste hydraulic oils
13 01 01* hydraulic oils, containing PCBs
13 01 04* chlorinated emulsions
13 01 05* non-chlorinated emulsions
13 01 09* mineral-based chlorinated hydraulic oils
13 01 10* mineral based non-chlorinated hydraulic oils
13 01 11* synthetic hydraulic oils
13 01 12* readily biodegradable hydraulic oils
13 01 13* other hydraulic oils

13 02 waste engine, gear and lubricating oils
13 02 04* mineral-based chlorinated engine, gear and lubricating oils
13 02 05* mineral-based non-chlorinated engine, gear and lubricating oils
13 02 06* synthetic engine, gear and lubricating oils
13 02 07* readily biodegradable engine, gear and lubricating oils
13 02 08* other engine, gear and lubricating oils

13 03 waste insulating and heat transmission oils
13 03 01* insulating or heat transmission oils containing PCBs
13 03 06* mineral-based chlorinated insulating and heat transmission oils other than those mentioned in 13 03 01
13 03 07* mineral-based non-chlorinated insulating and heat transmission oils
13 03 08* synthetic insulating and heat transmission oils
13 03 09* readily biodegradable insulating and heat transmission oils
13 03 10* other insulating and heat transmission oils

13 04 bilge oils
13 04 01* bilge oils from inland navigation
13 04 02* bilge oils from jetty sewers
13 04 03* bilge oils from other navigation

13 05 oil/water separator contents
13 05 01* solids from grit chambers and oil/water separators
13 05 02* sludges from oil/water separators
13 05 03* interceptor sludges
13 05 06* oil from oil/water separators
13 05 07* oily water from oil/water separators
mixtures of wastes from grit chambers and oil/water separators

wastes of liquid fuels
  fuel oil and diesel
  petrol
  other fuels (including mixtures)

oil wastes not otherwise specified
  desalter sludges or emulsions
  other emulsions
  wastes not otherwise specified

WASTE ORGANIC SOLVENTS, REFRIGERANTS AND PROPELLANTS (except 07 and 08)

waste organic solvents, refrigerants and foam/aerosol propellants
  chlorofluorocarbons, HCFC, HFC
  other halogenated solvents and solvent mixtures
  other solvents and solvent mixtures
  sludges or solid wastes containing halogenated solvents
  sludges or solid wastes containing other solvents

WASTE PACKAGING; ABSORBENTS, WIPING CLOTHS, FILTER MATERIALS AND PROTECTIVE CLOTHING NOT OTHERWISE SPECIFIED

packaging (including separately collected municipal packaging waste)
  paper and cardboard packaging
  plastic packaging
  wooden packaging
  metallic packaging
  composite packaging
  mixed packaging
  glass packaging
  textile packaging
  packaging containing residues of or contaminated by dangerous substances
  metallic packaging containing a dangerous solid porous matrix (for example asbestos), including empty pressure containers

absorbents, filter materials, wiping cloths and protective clothing
  absorbents, filter materials (including oil filters not otherwise specified), wiping cloths, protective clothing contaminated by dangerous substances
  absorbents, filter materials, wiping cloths and protective clothing other than those mentioned in 15 02 02

WASTES NOT OTHERWISE SPECIFIED IN THE LIST
16 01  end-of-life vehicles from different means of transport (including off-road machinery) and wastes from dismantling of end-of-life vehicles and vehicle maintenance (except 13, 14, 16 06 and 16 08)

16 01 03  end-of-life tyres
16 01 04*  end-of-life vehicles
16 01 06  end-of-life vehicles, containing neither liquids nor other hazardous components
16 01 07*  oil filters
16 01 08*  components containing mercury
16 01 09*  components containing PCBs
16 01 10*  explosive components (for example air bags)
16 01 11*  brake pads containing asbestos
16 01 12  brake pads other than those mentioned in 16 01 11
16 01 13*  brake fluids
16 01 14*  antifreeze fluids containing dangerous substances
16 01 15  antifreeze fluids other than those mentioned in 16 01 14
16 01 16  tanks for liquefied gas
16 01 17  ferrous metal
16 01 18  non-ferrous metal
16 01 19  plastic
16 01 20  glass
16 01 21*  hazardous components other than those mentioned in 16 01 07 to 16 01 11 and 16 01 13 and 16 01 14
16 01 22  components not otherwise specified
16 01 99  wastes not otherwise specified

16 02  wastes from electrical and electronic equipment and other equipment
16 02 09*  transformers and capacitors containing PCBs
16 02 10*  discarded equipment containing or contaminated by PCBs other than those mentioned in 16 02 09
16 02 11*  discarded equipment containing chlorofluorocarbons, HCFC, HFC
16 02 12*  discarded equipment containing free asbestos
16 02 13*  discarded equipment containing hazardous components¹ other than those mentioned in 16 02 09 to 16 02 12
16 02 14  discarded equipment other than those mentioned in 16 02 09 to 16 02 13
16 02 15*  hazardous components removed from discarded equipment
16 02 16  components removed from discarded equipment other than those mentioned in 16 02 15
16 02 97*  other equipment containing hazardous components
16 02 98  other equipment other than those mentioned in 16 02 97

16 03  off-specification batches and unused products
16 03 03*  inorganic wastes containing dangerous substances
16 03 04  inorganic wastes other than those mentioned in 16 03 03
16 03 05*  organic wastes containing dangerous substances
16 03 06  organic wastes other than those mentioned in 16 03 05

¹ Hazardous components from electrical and electronic equipment may include accumulators and batteries mentioned in 16 06 and marked as hazardous; mercury switches, glass from cathode ray tubes and other activated glass, etc.
16 04 waste explosives
   16 04 01* waste ammunition
   16 04 02* fireworks wastes
   16 04 03* other waste explosives

16 05 gases in pressure containers and discarded chemicals
   16 05 04* gases in pressure containers (including halons) containing dangerous substances
   16 05 05 gases in pressure containers other than those mentioned in 16 05 04
   16 05 06* laboratory chemicals, consisting of or containing dangerous substances, including mixtures of laboratory chemicals
   16 05 07* discarded inorganic chemicals consisting of or containing dangerous substances
   16 05 08* discarded organic chemicals consisting of or containing dangerous substances
   16 05 09 discarded chemicals other than those mentioned in 16 05 06, 16 05 07 or 16 05 08

16 06 batteries and accumulators
   16 06 01* lead batteries
   16 06 02* Ni-Cd batteries
   16 06 03* mercury-containing batteries
   16 06 04 alkaline batteries (except 16 06 03)
   16 06 05 other batteries and accumulators
   16 06 06* separately collected electrolyte from batteries and accumulators

16 07 wastes from transport tank, storage tank and barrel cleaning (except 05 and 13)
   16 07 08* wastes containing oil
   16 07 09* wastes containing other dangerous substances
   16 07 99 wastes not otherwise specified

16 08 spent catalysts
   16 08 01 spent catalysts containing gold, silver, rhenium, rhodium, palladium, iridium or platinum (except 16 08 07)
   16 08 02* spent catalysts containing dangerous transition metals or dangerous transition metal compounds
   16 08 03 spent catalysts containing transition metals or transition metal compounds not otherwise specified
   16 08 04 spent fluid catalytic cracking catalysts (except 16 08 07)
   16 08 05* spent catalysts containing phosphoric acid
   16 08 06* spent liquids used as catalysts
   16 08 07* spent catalysts contaminated with dangerous substances

16 09 oxidising substances

---

2 For the purpose of this entry, transition metals are: scandium, vanadium, manganese, cobalt, copper, yttrium, niobium, hafnium, tungsten, titanium, chromium, iron, nickel, zinc, zirconium, molybdenum and tantalum. These metals or their compounds are dangerous if they are classified as dangerous substances. The classification of dangerous substances shall determine which among those transition metals and which transition metal compounds are hazardous.
16 09 01* permanganates, for example potassium permanganate
16 09 02* chromates, for example potassium chromate, potassium or sodium dichromate
16 09 03* peroxides, for example hydrogen peroxide
16 09 04* oxidising substances, not otherwise specified

16 10 **aqueous liquid wastes destined for off-site treatment**
16 10 01* aqueous liquid wastes containing dangerous substances
16 10 02 aqueous liquid wastes other than those mentioned in 16 10 01
16 10 03* aqueous concentrates containing dangerous substances
16 10 04 aqueous concentrates other than those mentioned in 16 10 03

16 11 **waste linings and refractories**
16 11 01* carbon-based linings and refractories from metallurgical processes containing dangerous substances
16 11 02 carbon-based linings and refractories from metallurgical processes others than those mentioned in 16 11 01
16 11 03* other linings and refractories from metallurgical processes containing dangerous substances
16 11 04 other linings and refractories from metallurgical processes other than those mentioned in 16 11 03
16 11 05* linings and refractories from non-metallurgical processes containing dangerous substances
16 11 06 linings and refractories from non-metallurgical processes others than those mentioned in 16 11 05

17 **CONSTRUCTION AND DEMOLITION WASTES (INCLUDING EXCAVATED SOIL FROM CONTAMINATED SITES)**

17 01 **concrete, bricks, tiles and ceramics**
17 01 01 concrete
17 01 02 bricks
17 01 03 tiles and ceramics
17 01 06* mixtures of, or separate fractions of concrete, bricks, tiles and ceramics containing dangerous substances
17 01 07 mixtures of concrete, bricks, tiles and ceramics other than those mentioned in 17 01 06

17 02 **wood, glass and plastic**
17 02 01 wood
17 02 02 glass
17 02 03 plastic
17 02 04* glass, plastic and wood containing or contaminated with dangerous substances

17 03 **bituminous mixtures, coal tar and tarred products**
17 03 01* bituminous mixtures containing coal tar
17 03 02 bituminous mixtures other than those mentioned in 17 03 01
17 03 03* coal tar and tarred products
### 17 04  
**metals (including their alloys)**
- 17 04 01 copper, bronze, brass
- 17 04 02 aluminium
- 17 04 03 lead
- 17 04 04 zinc
- 17 04 05 iron and steel
- 17 04 06 tin
- 17 04 07 mixed metals
- 17 04 09* metal waste contaminated with dangerous substances
- 17 04 10* cables containing oil, coal tar and other dangerous substances
- 17 04 11 cables other than those mentioned in 17 04 10

### 17 05  
**soil (including excavated soil from contaminated sites), stones and dredging spoil**
- 17 05 03* soil and stones containing dangerous substances
- 17 05 04 soil and stones other than those mentioned in 17 05 03
- 17 05 05* dredging spoil containing dangerous substances
- 17 05 06 dredging spoil other than those mentioned in 17 05 05
- 17 05 07* track ballast containing dangerous substances
- 17 05 08 track ballast other than those mentioned in 17 05 07

### 17 06  
**insulation materials and asbestos-containing construction materials**
- 17 06 01* insulation materials containing asbestos
- 17 06 03* other insulation materials consisting of or containing dangerous substances
- 17 06 04 insulation materials other than those mentioned in 17 06 01 and 17 06 03
- 17 06 05* construction materials containing asbestos

### 17 08  
**gypsum-based construction material**
- 17 08 01* gypsum-based construction materials contaminated with dangerous substances
- 17 08 02 gypsum-based construction materials other than those mentioned in 17 08 01

### 17 09  
**other construction and demolition wastes**
- 17 09 01* construction and demolition wastes containing mercury
- 17 09 02* construction and demolition wastes containing PCB (for example PCB-containing sealants, PCB-containing resin-based floorings, PCB-containing sealed glazing units, PCB-containing capacitors)
- 17 09 03* other construction and demolition wastes (including mixed wastes) containing dangerous substances
- 17 09 04 mixed construction and demolition wastes other than those mentioned in 17 09 01, 17 09 02 and 17 09 03

### 18  
**WASTES FROM HUMAN OR ANIMAL HEALTH CARE AND/OR RELATED RESEARCH (except kitchen and restaurant wastes not arising from immediate health care)**

### 18 01  
**wastes from natal care, diagnosis, treatment or prevention of disease in humans**
- 18 01 01 sharps (except 18 01 03)
18 01 02  body parts and organs including blood bags and blood preserves (except 18 01 03)
18 01 03* wastes whose collection and disposal is subject to special requirements in order to prevent infection
18 01 04  wastes whose collection and disposal is not subject to special requirements in order to prevent infection (for example dressings, plaster casts, linen, disposable clothing, diapers)
18 01 06* chemicals consisting of or containing dangerous substances
18 01 07  chemicals other than those mentioned in 18 01 06
18 01 08* cytotoxic and cytostatic medicines
18 01 09* medicines other than those mentioned in 18 01 08
18 01 10* amalgam waste from dental care

18 02  wastes from research, diagnosis, treatment or prevention of disease involving animals
18 02 01  sharps (except 18 02 02)
18 02 02* wastes whose collection and disposal is subject to special requirements in order to prevent infection
18 02 03  wastes whose collection and disposal is not subject to special requirements in order to prevent infection
18 02 05* chemicals consisting of or containing dangerous substances
18 02 06  chemicals other than those mentioned in 18 02 05
18 02 07* cytotoxic and cytostatic medicines
18 02 08* medicines other than those mentioned in 18 02 07

19  WASTES FROM WASTE MANAGEMENT FACILITIES, OFF-SITE WASTE WATER TREATMENT PLANTS AND THE PREPARATION OF WATER INTENDED FOR HUMAN CONSUMPTION AND WATER FOR INDUSTRIAL USE

19 01  wastes from incineration or pyrolysis of waste
19 01 02  ferrous materials removed from bottom ash
19 01 05* filter cake from gas treatment
19 01 06* aqueous liquid wastes from gas treatment and other aqueous liquid wastes
19 01 07* solid wastes from gas treatment
19 01 10* spent activated carbon from flue-gas treatment
19 01 11* bottom ash and slag containing dangerous substances
19 01 12  bottom ash and slag other than those mentioned in 19 01 11
19 01 13* fly ash containing dangerous substances
19 01 14  fly ash other than those mentioned in 19 01 13
19 01 15* boiler dust containing dangerous substances
19 01 16  boiler dust other than those mentioned in 19 01 15
19 01 17* pyrolysis wastes containing dangerous substances
19 01 18  pyrolysis wastes other than those mentioned in 19 01 17
19 01 19  sands from fluidised beds
19 01 99  wastes not otherwise specified

19 02  wastes from physico/chemical treatments of waste (including dechromatation, decyanidation, neutralisation)
19 02 03 premixed wastes composed only of non-hazardous wastes
19 02 04* premixed wastes composed of at least one hazardous waste
19 02 05* sludges from physico/chemical treatment containing dangerous substances
19 02 06 sludges from physico/chemical treatment other than those mentioned in 19 02 05
19 02 07* oil and concentrates from separation
19 02 08* liquid combustible wastes containing dangerous substances
19 02 09* solid combustible wastes containing dangerous substances
19 02 10 combustible wastes other than those mentioned in 19 02 08 and 19 02 09
19 02 11* other wastes containing dangerous substances
19 02 99 wastes not otherwise specified

19 03 stabilised/solidified wastes
19 03 04* wastes marked as hazardous, partly4 stabilized
19 03 05 stabilised wastes other than those mentioned in 19 03 04
19 03 06* wastes marked as hazardous, solidified
19 03 07 solidified wastes other than those mentioned in 19 03 06

19 04 vitrified waste and wastes from vitrification
19 04 01 vitrified waste
19 04 02* fly ash and other flue-gas treatment wastes
19 04 03* non-vitrified solid phase
19 04 04 aqueous liquid wastes from vitrified waste tempering

19 05 wastes from aerobic treatment of solid wastes
19 05 01 non-composted fraction of municipal and similar wastes
19 05 02 non-composted fraction of animal and vegetable waste
19 05 03 off-specification compost
19 05 99 wastes not otherwise specified

19 06 wastes from anaerobic treatment of waste
19 06 03 liquor from anaerobic treatment of municipal waste
19 06 04 digestate from anaerobic treatment of municipal waste
19 06 05 liquor from anaerobic treatment of animal and vegetable waste
19 06 06 digestate from anaerobic treatment of animal and vegetable waste
19 06 99 wastes not otherwise specified

19 07 landfill leachate
19 07 02* landfill leachate containing dangerous substances
19 07 03 landfill leachate other than those mentioned in 19 07 02

19 08 wastes from waste water treatment plants not otherwise specified
19 08 01 screenings
19 08 02 waste from desanding

3 Stabilisation processes change the dangerousness of the constituents in the waste and thus transform hazardous waste into non-hazardous waste. Solidification processes only change the physical state of the waste (e.g. liquid into solid) by using additives without changing the chemical properties of the waste.

4 A waste is considered as partly stabilised if, after the stabilisation process, dangerous constituents which have not been changed completely into non-dangerous constituents could be released into the environment in the short, middle or long term.
19 08 05 sludges from treatment of urban waste water
19 08 06* saturated or spent ion exchange resins
19 08 07* solutions and sludges from regeneration of ion exchangers
19 08 08* membrane system waste containing heavy metals
19 08 09 grease and oil mixture from oil/water separation containing only edible oil and fats
19 08 10* grease and oil mixture from oil/water separation other than those mentioned in 19 08 09
19 08 11* sludges containing dangerous substances from biological treatment of industrial waste water
19 08 12 sludges from biological treatment of industrial waste water other than those mentioned in 19 08 11
19 08 13* sludges containing dangerous substances from other treatment of industrial waste water
19 08 14 sludges from other treatment of industrial waste water other than those mentioned in 19 08 13
19 08 99 wastes not otherwise specified

19 09 wastes from the preparation of water intended for human consumption or water for industrial use
19 09 01 solid waste from primary filtration and screenings
19 09 02 sludges from water clarification
19 09 03 sludges from decarbonation
19 09 04 spent activated carbon
19 09 05 saturated or spent ion exchange resins
19 09 06 solutions and sludges from regeneration of ion exchangers
19 09 99 wastes not otherwise specified

19 10 wastes from shredding of metal-containing wastes
19 10 01 iron and steel waste
19 10 02 non-ferrous waste
19 10 03* fluff-light fraction and dust containing dangerous substances
19 10 04 fluff-light fraction and dust other than those mentioned in 19 10 03
19 10 05* other fractions containing dangerous substances
19 10 06 other fractions other than those mentioned in 19 10 05

19 11 wastes from oil regeneration
19 11 01* spent filter clays
19 11 02* acid tars
19 11 03* aqueous liquid wastes
19 11 04* wastes from cleaning of fuel with bases
19 11 05* sludges from on-site effluent treatment containing dangerous substances
19 11 06 sludges from on-site effluent treatment other than those mentioned in 19 11 05
19 11 07* wastes from flue-gas cleaning
19 11 99 wastes not otherwise specified

19 12 wastes from the mechanical treatment of waste (for example sorting, crushing, compacting, pelletising) not otherwise specified
19 12 01 paper and cardboard
19 12 02 ferrous metal
19 12 03 non-ferrous metal
19 12 04 plastic and rubber
19 12 05 glass
19 12 06* wood containing dangerous substances
19 12 07 wood other than that mentioned in 19 12 06
19 12 08 textiles
19 12 09 minerals (for example sand, stones)
19 12 10 combustible waste (refuse derived fuel)
19 12 11* other wastes (including mixtures of materials) from mechanical treatment of waste containing dangerous substances
19 12 12 other wastes (including mixtures of materials) from mechanical treatment of wastes other than those mentioned in 19 12 11

19 13 wastes from soil and groundwater remediation
19 13 01* solid wastes from soil remediation containing dangerous substances
19 13 02 solid wastes from soil remediation other than those mentioned in 19 13 01
19 13 03* sludges from soil remediation containing dangerous substances
19 13 04 sludges from soil remediation other than those mentioned in 19 13 03
19 13 05* sludges from groundwater remediation containing dangerous substances
19 13 06 sludges from groundwater remediation other than those mentioned in 19 13 05
19 13 07* aqueous liquid wastes and aqueous concentrates from groundwater remediation containing dangerous substances
19 13 08 aqueous liquid wastes and aqueous concentrates from groundwater remediation other than those mentioned in 19 13 07

20 MUNICIPAL WASTES (HOUSEHOLD WASTE AND SIMILAR COMMERCIAL, INDUSTRIAL AND INSTITUTIONAL WASTES) INCLUDING SEPARATELY COLLECTED FRACTIONS

20 01 separate fractions (except 15 01)
20 01 01 paper and cardboard
20 01 02 glass
20 01 08 biodegradable kitchen and canteen waste
20 01 10 clothes
20 01 11 textiles
20 01 13* solvents
20 01 14* acids
20 01 15* alkalines
20 01 17* photochemicals
20 01 19* pesticides
20 01 21* fluorescent tubes and other mercury-containing waste
20 01 23* discarded equipment containing chlorofluorocarbons
20 01 25 edible oil and fat
20 01 26* oil and fat other than those mentioned in 20 01 25
20 01 27* paint, inks, adhesives and resins containing dangerous substances
20 01 28 paint, inks, adhesives and resins other than those mentioned in 20 01 27
20 01 29* detergents containing dangerous substances
20 01 30 detergents other than those mentioned in 20 01 29
20 01 31* cytotoxic and cytostatic medicines
20 01 32* medicines other than those mentioned in 20 01 31
20 01 33* batteries and accumulators included in 16 06 01, 16 06 02 or 16 06 03 and unsorted batteries and accumulators containing these batteries
20 01 34 batteries and accumulators other than those mentioned in 20 01 33
20 01 35* discarded electrical and electronic equipment other than those mentioned in 20 01 21 and 20 01 23 containing hazardous components
20 01 36 discarded electrical and electronic equipment other than those mentioned in 20 01 21, 20 01 23 and 20 01 35
20 01 37* wood containing dangerous substances
20 01 38 wood other than that mentioned in 20 01 37
20 01 39 plastics
20 01 40 metals
20 01 41 wastes from chimney sweeping
20 01 99 fractions not otherwise specified

20 02 garden and park wastes (including cemetery waste)
20 02 01 biodegradable waste
20 02 02 soil and stones
20 02 03 other non-biodegradable wastes

20 03 other municipal wastes
20 03 01 mixed municipal waste
20 03 02 waste from markets
20 03 03 street-cleaning residues
20 03 04 septic tank sludge
20 03 06 waste from sewage cleaning
20 03 07 bulky waste
20 03 99 municipal wastes not otherwise specified

5 Hazardous components from electrical and electronic equipment may include accumulators and batteries mentioned in 16 06 and marked as hazardous; mercury switches, glass from cathode ray tubes and other activated glass etc.
Annex 5

DEFINING THE QUALITY OF MUNICIPAL WASTEWATER SLUDGE AND INFORMATION TO BE PROVIDED TO SUPERVISORY AUTHORITIES

1. Defining the quality of municipal wastewater sludge
A facility producing municipal wastewater sludge shall, if necessary, analyse the concentrations of heavy metals and other harmful substances and the total nitrogen and total phosphorus concentrations contained in the sludge.

The sludge samples shall have the same properties as the sludge delivered from the treatment plant for recovery or disposal. Sludge quality shall be defined at least once every two years. In order to monitor fluctuations in the quality of sludge delivered for agricultural use, the quality must initially be defined at short intervals. If there is little fluctuation in the results during the first year, the frequency of analyses can be decreased. The frequency of analyses of sludge delivered for agricultural use shall be determined by the size of the treatment plant as follows:

<table>
<thead>
<tr>
<th>Population equivalent</th>
<th>Frequency of analyses/year</th>
</tr>
</thead>
<tbody>
<tr>
<td>First year</td>
<td>Subsequent years</td>
</tr>
</tbody>
</table>
If the quality of the incoming sewage has altered significantly, the frequency of analyses shall be increased to at least the level required during the first year. The quality of the sludge shall be analysed by a reliable laboratory. At least the concentrations in the sludge of the following substances shall be determined:

- total nitrogen ($N_{\text{tot}}$)
- total phosphorus ($P_{\text{tot}}$)
- cadmium, chromium, copper, nickel, lead and zinc
- mercury

The analyses shall be conducted in compliance with a standard confirmed by the European Committee for Standardization (CEN) or the International Organisation for Standardization (ISO) for determining the quality of sludge.

2. Information to be provided to supervisory authorities

In accordance with section 18, the facility producing municipal wastewater sludge shall provide the supervisory authorities with a summary of the following information on municipal wastewater sludge:

- the quantity of sludge produced
- pre-treatment of the sludge to reduce pathogens and organisms harmful to plant health
- properties describing the quality of sludge, determined in accordance with Part 1 of this annex
- the quantity of sludge recovered or disposed of, and the method of recovery or disposal, including the quantity of sludge delivered for agricultural use
